

RANGE FOR SPIRITS

Setop DIAM

EDITORIAL

Thanks to the trust you have placed in us, Diam Bouchage is the world leader of technological cork closures. We design, manufacture and market technological cork closures for still wines, sparkling wines, and spirits.

The Setop Diam cork is more than just an ordinary closure. It is fully customizable and integrated in your packaging. It contributes to the story that the finest spirit makers want to tell through choice of the cork's shape, material or colour.

A dedicated design department develops your Setop Diam cork, specifically adapted to each bottle profile for optimal fit and resistance to successive openings.

All our micro-agglomerate corks bear the Setop Diam guarantee. They offer absolutely unrivalled organoleptic neutrality and a perfect homogeneity from one cork to the next in order to offer optimal storage conditions.

For the classic range as well as the Element corks, Setop Diam brings to your product a know-how and expertise to design outstanding tailored closures, capable of meeting each and every one of your requirements.

“CORK IS OUR RAW MATERIAL. CUSTOM MADE IS OUR PROFESSION. OUR COMMITMENT IS THE SETOP GUARANTEE.”

MORE THAN JUST A CORK, A CONCEPT.

SETOP

A wide range, from the simplest to the most complex

The Setop cork is made of a micro-agglomerated cork shank treated using the DIAMANT® supercritical CO₂ process. It can be fitted with a top in various tones of wood, metal, zamak, plastic or any other material of your liking.

Our teams are here to serve your imagination and create a cork that perfectly renders your vision, customized by using a range of techniques including laser engraving, embossing and stamping...

SETOP ELEMENT

Upcycling your raw materials

With the Element concept, we support you in the design of a unique and aesthetic cork which respects the planet and your product identity:

A top that recycles raw materials typically considered as natural waste from the spirit manufacturing process (wood chippings, whisky grain, apple pulp, lavender, etc.);

A Setop Origine cork certified “OK bio-based**** (1)” made of cork and a beeswax emulsion ;

A binding agent made from bio-based polyols.

A specific battery of tests is conducted for each project to evaluate if the raw materials can be used.

(1) Maximum rating for Bio-sourced products

THE SETOP DIAM GUARANTEE

SENSORY SECURITY

DIAMANT® supercritical CO₂ process.
No cork taint cork to cork guarantee.

CONSISTENT CORK REBOUND

For an optimal bottling experience and no risk of oxidation.

NO CAPILLARY RISES

Zero alcohol penetration: the cork retains its durability over time.

NO DUST OR FLOATERS

For a greater quality end product.

RELIABLE OPENING TORQUE

Resistance to multiple handling with zero risk of breakage.
